PROFESSIONAL SUMMARY

- **AWS Certified Solutions Architect – Associate** and Cloud Practitioner with 5.5+ years of hands-on experience designing, deploying, and managing
- scalable, secure, and cost-optimized cloud infrastructures across **AWS, Azure, and GCP.**
- Deep expertise in **Infrastructure as Code (IaC)** using Terraform v1.7+ and AWS CloudFormation to automate end-to-end provisioning.
- Proficient in **container orchestration** with Docker 24.x, Kubernetes (EKS v1.29), ECR, and ECS for microservices deployments at scale.
- Extensive experience building and managing **CI/CD pipelines** via Jenkins 2.x, GitHub Actions, and AWS CodePipeline for zero-downtime deployments.
- Hands-on with **serverless architectures** using AWS Lambda, API Gateway, and EventBridge to reduce operational overhead and infrastructure costs.
- Established **multi-account AWS governance** using AWS Organizations, Control Tower, IAM, and Service Control Policies (SCPs) ensuring compliance and security standardization.
- Designed **advanced cloud networking** with VPCs, Transit Gateway, PrivateLink, Direct Connect, and VPN for secure hybrid and multi-account connectivity.
- Implemented comprehensive **observability frameworks** using CloudWatch, Prometheus v2.x, Grafana v10.x, AWS X-Ray, and OpenTelemetry to achieve 99.9% uptime.
- Managed **relational and NoSQL databases** (RDS Aurora, PostgreSQL, DynamoDB) with performance tuning, high availability, and automated backup strategies.
- Conducted regular **cloud cost optimization** reviews — rightsizing, resource tagging, Reserved/Spot Instances — delivering measurable cost savings.
- Led **incident management and RCA** initiatives to resolve P1/P2 production issues and implement preventive automation across multi-cloud environments.
- Collaborated with **Dev, SecOps, and IT teams** to enforce security best practices, IAM policies, firewall rules, network auditing, and compliance frameworks.
- Experience with **ELK Stack (Elasticsearch 8.x, Logstash, Kibana)** and SIEM integration for centralized logging, anomaly detection, and real-time alerting dashboards.

TECHNICAL SKILLS

Cloud Platforms	AWS (EC2, S3, ELB, VPC, RDS, Lambda, CloudFront, CloudFormation, Route53, Auto Scaling, ECS, EKS, DynamoDB, SQS, SNS, SES, Beanstalk) · Azure (AKS, Pipelines, Blob Storage) · GCP (GKE, Cloud Run, BigQuery)
DevOps & CI/CD	Jenkins 2.440 · GitHub Actions · AWS CodePipeline · Azure DevOps Pipelines · AWS CodeBuild · CodeDeploy
Containers & Orchestration	Docker 24.x · Kubernetes (EKS v1.35, AKS, GKE) · Helm 3.x · ECR · ECS (Fargate & EC2 launch types) · Docker Compose
Infrastructure as Code	Terraform v1.7+ (AWS, Azure, GCP providers) · AWS CloudFormation · Ansible 2.16 · AWS CDK
Monitoring & Observability	Prometheus v2.50 · Grafana v10.3 · AWS CloudWatch · AWS X-Ray · OpenTelemetry · Datadog · PagerDuty
Logging & SIEM	ELK Stack (Elasticsearch 8.x · Logstash · Kibana) · Fluentd · AWS CloudTrail · AWS Config

Databases	Amazon RDS · Aurora PostgreSQL · MySQL · DynamoDB · Redis · ElastiCache · PostgreSQL 15.x
Networking & Security	VPC · Transit Gateway · PrivateLink · Route53 · WAF · Shield · IAM · KMS · Secrets Manager · Security Groups · NACLs · VPN · Direct Connect
Scripting & Programming	Bash / Shell Scripting · Python 3.11.x (boto3) · YAML · JSON · HCL
Operating Systems	Linux (Ubuntu 24.x LTS · CentOS 7/8 · Debian 12 · Amazon Linux 2023) · Windows Server
Web & App Servers	Nginx 1.25 · Apache HTTP Server 2.4 · Node.js 18.x, 22.x, 24.x (deployment & reverse proxy)

PROFESSIONAL EXPERIENCE

WhiteOak Capital Asset Management Limited | *Mumbai, India*

Cloud Engineer – Assistant Manager

December 2024 – Present

- Designed and implemented **secure, scalable AWS architectures** supporting business-critical applications with high performance, reliability, and regulatory compliance.
- Deployed and managed **containerized workloads using Docker 24.x, ECR, ECS (Fargate), and EKS v1.29**, (Helm) enabling efficient orchestration, horizontal scaling, and seamless CI/CD integration.
- Implemented **serverless solutions with AWS Lambda, API Gateway v2, and EventBridge**, improving application agility and reducing infrastructure costs by eliminating idle compute.
- Automated infrastructure provisioning using **Terraform v1.7+, AWS CloudFormation**, cutting manual provisioning time by 60% and ensuring drift-free environments.
- Established **multi-account AWS governance with AWS Organizations, Control Tower, IAM, and SCPs**, maintaining compliance and security standardization across 15+ AWS accounts.
- Configured **advanced cloud networking with VPCs, Transit Gateway, PrivateLink, and VPN Connect**, enabling secure hybrid and multi-account connectivity with zero single points of failure.
- Built comprehensive **observability frameworks with CloudWatch, Prometheus v2.50, Grafana v10.3, AWS X-Ray, and OpenTelemetry**, achieving 99.9% system uptime and sub-5-minute incident detection.
- Developed **automated alert dashboards integrated with SIEM systems** to proactively detect anomalies, optimize performance, and trigger automated remediation workflows.
- Managed **RDS Aurora, PostgreSQL, and DynamoDB** clusters with Multi-AZ failover, read replicas, and automated snapshots, ensuring 99.95% database availability.
- Conducted **cloud cost optimization reviews** applying rightsizing, Reserved/Spot Instances, and S3 lifecycle policies — achieving 30%+ reduction in monthly cloud spend.
- Led **incident management and Root Cause Analysis (RCA)** for P1/P2 production incidents, implementing runbooks and automated remediation to prevent recurrence.

Life on a Plane LCC | *New York, USA (Remote)*

Cloud & DevOps Engineer

January 2024 – May 2024

- Designed and deployed **multi-cloud infrastructures on AWS, GCP, and Azure** with standardized Terraform v1.6 modules, ensuring environment parity across clouds.
- Built robust **CI/CD pipelines using Jenkins 2.430 and Docker 24.x**, automating build, test, and deploy stages with rollback capabilities for zero-downtime releases.
- Managed and optimized Amazon RDS for PostgreSQL 15.x, implementing automated snapshots, Multi-AZ deployments for high availability, and performance insights to ensure 99.9% uptime and data integrity.
- Deployed **Nginx 1.25 reverse proxy and load balancer** with SSL termination, upstream health checks, and rate limiting for improved application reliability.
- Implemented **Kubernetes v1.28 clusters for microservices** with HPA, PodDisruptionBudgets, and Helm 3.x chart-based deployments ensuring high availability.
- Automated infrastructure provisioning using **custom Terraform modules** and **workspaces**, implementing secure **remote state management with cloud storage (S3) and state locking** to reduce provisioning time from hours to minutes while ensuring zero resource conflicts.
- Managed **Azure DevOps Pipelines** for CI/CD workflows and directed cloud migration projects from on-premises to Azure with minimal business disruption.

- Delivered **cloud governance best practices, cost optimization strategies, and security hardening guidance** for cloud services across AWS, Azure, and GCP.

Epethilial Tech Services Pvt. Ltd. | *Hyderabad, India (Remote)*

Senior DevOps Engineer

September 2023 – November 2023

- Designed and optimized **Azure** , **AWS and GCP infrastructure** with Terraform v1.5 IaC, reducing provisioning time by 40% and eliminating manual configuration errors.
- Engineered **GitOps-driven CI/CD pipelines** using **AWS CodePipeline** and **Helm Charts**, leveraging **ArgoCD** for automated, declarative Kubernetes deployments and blue/green rollout strategies to ensure zero-downtime delivery.
- Configured **ELK Stack (Elasticsearch 8.x, Logstash, Kibana)** for centralized log aggregation, real-time monitoring, and operational dashboards.
- Managed and optimized **Amazon RDS for PostgreSQL 14.x** and **ElastiCache (Redis)**, implementing Multi-AZ deployments for high availability and distributed caching to reduce database load, ensuring 99.9% uptime and data integrity
- Led **AWS cloud migration projects** including complex database migrations using AWS DMS and Schema Conversion Tool (SCT), achieving zero data loss.
- Implemented **IAM least-privilege policies, Security Groups, and VPC flow logs** to strengthen the cloud security posture and meet compliance requirements.
- Authored **Shell and Python 3.11 automation scripts** for scheduled maintenance tasks, automated alerting, and resource lifecycle management.

CityLab International Pvt. Ltd. | *London, UK (Remote)*

Senior Cloud Engineer

November 2022 – September 2023

- Architected **AZURE**, **AWS and GCP solutions with EC2 Auto Scaling, ALB, IAM, and VPC** for business-critical applications handling high-traffic loads.
- Deployed **Kubernetes workloads with Nginx 1.25 load balancing** and configured Ingress Controllers, TLS certificates, and network policies for production-grade security.
- Implemented **Elasticsearch 8.x and Kibana dashboards** for real-time operational monitoring, capacity planning, and SLA tracking.
- Deployed **Node.js REST APIs and React front-end applications** using Docker and Nginx with multi-stage build pipelines, reducing image size by 40%.
- Designed **Azure infrastructure with Azure Pipelines, AKS, and Blob Storage**, migrating legacy workloads to cloud-native architectures with minimal downtime.
- Optimized **PostgreSQL 13.x database performance** with read replicas, connection pooling, and automated PITR backups, improving read throughput by 35%.
- Led **cloud optimization and security best practice adoption**, implementing cost tagging, Reserved Instances, and IAM Access Analyzer to reduce spend and surface misconfigurations.
- Configured **AWS CloudFormation stacks and Terraform modules** for repeatable, version-controlled infrastructure deployments across dev, staging, and production environments.

Brain Vision Tech Pvt. Ltd. | *Pune, India*

Cloud Support Engineer (AWS)

February 2020 – October 2022

- Managed **IAM users, roles, policies, MFA enforcement, and CloudTrail logging** for compliance with internal security standards and audit requirements.
- Designed **scalable AWS and AZURE environments with EC2 Auto Scaling Groups, ALB, and Route53**, ensuring applications handled peak traffic with automatic capacity adjustments.
- Built **CloudWatch monitoring, dashboards, and SNS-based alerting** for proactive incident detection, with automated remediation via Lambda triggers.
- Automated operational tasks with **Bash/Shell scripting and Python 3.x (boto3)**, including AMI creation, log rotation, S3 lifecycle management, and EC2 patching.
- Deployed and maintained **VPC configurations, subnets, NACLs, NAT Gateways, and CloudFormation stacks** for secure, highly available networking architectures.
- Implemented **backup and disaster recovery strategies** using AWS Backup, RDS automated snapshots, and cross-region S3 replication to meet RTO/RPO targets.
- Administered **Linux environments (Ubuntu 20.04, CentOS 7, Amazon Linux 2)** including system tuning, package management, cron jobs, and SSH hardening.

EDUCATION

Qualification	Institution / Board	Year	Result / Grade
B.E. – Mechanical Engineering	University of Mumbai	2017	Graduated
HSC (12th Standard)	Maharashtra State Board (MSBSHSE)	2011	Completed
SSC (10th Standard)	Maharashtra State Board (MSBSHSE)	2009	Completed

LANGUAGES

English *Professional Working Proficiency (C1)*	**Hindi** *Professional Working Proficiency (C1)*	**Marathi** *Native / Bilingual (C2)*
